COMPUTER ENGINEERING

QUEZON CITY

COURSE CODE/TITLE:	CPE 010	**SECTION:**	CPE21S2
DATE PERFORMED:	08/07/2026	**DATE SUBMITTED:**	
NAME:	MATT JOHN ACALA	**INSTRUCTOR:**	Engr. Jimlord

ACTIVITY NO. 1 SEATWORK

1. PROCEDURE OUTPUT

main.cpp

```cpp
#include <iostream>
using namespace std;

float ComputeGrade(float q1, float q2, float q3) {
    return (q1 + q2 + q3)/3;
}

int main() {

    float q1, q2, q3, average;

    cout << "Enter Quiz 1 Score: " << endl;
    cin >> q1;

    cout << "Enter Quiz 2 Score: " << endl;
    cin >> q2;

    cout << "Enter Quiz 3 Score: " << endl;
    cin >> q3;

    average = ComputeGrade(q1, q2, q3);

    cout << "The Average Score is: " << average;

    return 0;
}
```

Output

```
Enter Quiz 1 Score:
100
Enter Quiz 2 Score:
50
Enter Quiz 3 Score:
70.5
The Average Score is: 73.5

=== Code Execution Successful ===
```

Algorithm: How to Compute the Average Score of 3 Quiz:

1. Create a function that compute the score for the 3 quiz.
   1.1 Add all the 3 Quizzes
   1.2 Then divide it by 3
2. Gather the scores for the 3 quizzes.
3. Use the function for the 3 score that you got.

PSEUDOCODE:

```
START

FUNCTION (float q1, float q2, float q3)
        Return (q1 + q2 + q3)/3
END FUNCTION

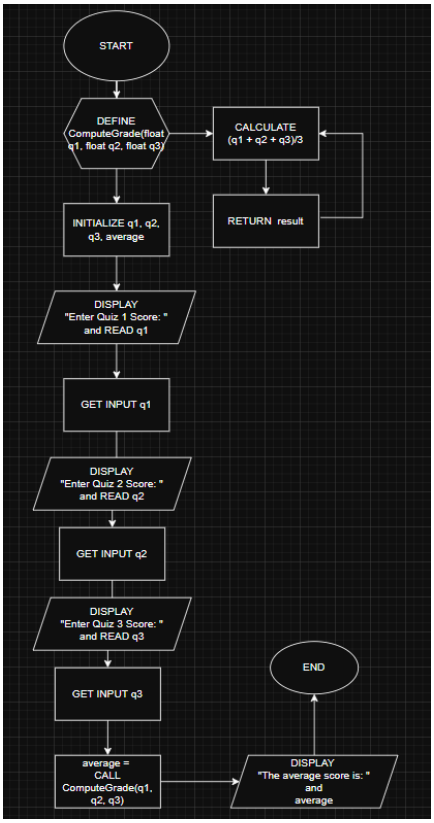

DECLARE q1, q2, q3, average

DISPLAY "Enter Quiz 1 Score: "
GET q1
DISPLAY "Enter Quiz 2 Score: "
GET q2
DISPLAY "Enter Quiz 3 Score: "
GET q3

average = FUNCTION(q1, q2, q3)

DISPLAY "The Average Score is: " + average;

END
```

CODE ANALYSIS:

First i remember when i read the objectives i can use a function so i can minimalize my code and avoid the computation on the main so i created a function that calculate the 3 quizzes to compute it average then on the main i get those values using “cin” then use the function i created which is the “ComputeGrade”.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: **Microsoft Copilot**

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: **Example generation, explanation of concept, and asking what is the error**

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: **Just like what i’ve said i just ask for the error and help me to solve on my own**

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.’s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
