QUEZON CITY

COURSE CODE/TITLE:	CPE 010	**SECTION:**	CPE21S2
DATE PERFORMED:	08/07/2026	**DATE SUBMITTED:**	
NAME:	MATT JOHN ACALA	**INSTRUCTOR:**	Engr. Jimlord

ACTIVITY NO. 1 SEATWORK

1. PROCEDURE OUTPUT

```
Algorithm: Cashiering system

1. Create a function that compute total item and the money.
        1.1 check if the money is greater than or equal to the total items
        1.2 total items is get by adding item 1, 2, 3
        1.3 if not display "Not Enough money"
2. Gather the money and the 3 items price
3. Use the function for the money and 3 items
4. use a conditional again to see if the money is enough
5. then print

PSEUDOCODE:

START

FUNCTION CashieringSystem(float money, float item1, float item2, float item3)
        if (money >= (item1 + item2 + item3)) {
        float change = money - (item1 + item2 + item3);
        return change;
    }
    else {
        DISPLAY "Not enough money";
        return -1;
    }
END FUNCTION

DECLARE money, item1, item2, item3, total

DISPLAY "How much is your money: "
GET money
DISPLAY "Enter Item 1 Price: "
GET item1
DISPLAY "Enter Item 2 Price: "
GET item2
DISPLAY "Enter Item 3 Price: "
GET item3

USE function CashieringSystem(money, item1, item2, item3)

CHECK if total != -1
        DISPLAY "Your change is " + total;

END
```

COMPUTER ENGINEERING

QUEZON CITY

main.cpp

Share Run

```cpp
#include <iostream>
using namespace std;

float CashieringSystem(float money, float item1, float item2, float item3) {
    if (money >= (item1 + item2 + item3)) {
        float change = money - (item1 + item2 + item3);
        return change;
    }
    else {
        cout << "Not enough money";
        return -1;
    }
}

int main() {

    float money, item1, item2, item3, total;

    cout << "How much is your money: ";
    cin >> money;
    cout << "Enter Item 1 Price: ";
    cin >> item1;
    cout << "Enter Item 2 Price: ";
    cin >> item2;
    cout << "Enter Item 3 Price: ";
    cin >> item3;

    total = CashieringSystem(money, item1, item2, item3);

    if (total != -1){
        cout << "Your change is: " << total;
    }

    return 0;
}
```

Output

```
How much is your money: 1000
Enter Item 1 Price: 500
Enter Item 2 Price: 200
Enter Item 3 Price: 130.5
Your change is: 169.5

=== Code Execution Successful ===
```

START
DEFINE CashieringSystem(float money, float item1, float item2, float item3)
INITIALIZE money, item1, item2, item3, total
DISPLAY "How much is your money: "
DISPLAY "Enter Item 1 Price: " READ item1
DISPLAY "Enter Item 2 Price: " READ item2
READ item2
DISPLAY "Enter Item 3 Price: " READ item3
total = CALL CashieringSystem(money, item1, item2, item3)
IS total != -1?
YES
DISPLAY "Your change is: " and total
NO
END
CALCULATE (item1 + item2 + item3)
IS money >= calculation result?
YES
CALCULATE change = money - calculation result
RETURN change
NO
DISPLAY "Not enough money"
RETURN -1

CODE ANALYSIS:
Same as the first part but this is where i got a problem since i dont know in the parameters of a function if you can use a conditional statement this is where i ask AI about the concepts and example then use it on my code
So i use a if to check if money greater than or equal to we can have the computation if its not it will return -1 and print “not enough money” same as the part 1 declared the variable then gather the value of it in the last part i just check if its not equal to -1 to print the function.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: **Microsoft Copilot**

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: **Example generation, explanation of concept, and asking what is the error**

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: **Just like what i’ve said i just ask for the error and help me to solve on my own**

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.’s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
